GitHub

Portfolio

Mobile & Web Skills

Programming Languages

JavaScript, TypeScript, JSX, HTML, CSS, Some Kotlin

Libraries & Frameworks

React Native, React, Next.js, Expo Router, Tailwind CSS, Jetpack Compose

Tools & Platforms

Expo Router, AWS Amplify, Git, GitHub, ChatGPT, Netlify, Figma, Google Play & App Store submission, Android Studio

Retail Experience

Club Monaco

Operations Supervisor
June 2019 – Oct 2022

Burberry

Operations/Sales
Mar 2016 – June 2019

Education

Columbia College Chicago

Programming (Minor)

Relevant Experience

Junior Software Developer • **Leap Inc Startup**

Sept 2022 – May 2023

Collaborated with UX designers and engineers to refactor the “for landlords” page on the Leap website

Designed and implemented various React.js components for users to gather leasing and real estate information while using a mobile first mindset

Participated in daily stand-up meetings with senior engineers and managers

Software Projects

Airbnb Clone App

[GitHub Repository](#)

Mimics the 2022 Airbnb UI; with key features such as Categories, a ChatGPT enabled chatbot for trip recommendations, Google autocomplete search and Google Maps functionality to select properties on the map based on price per night.

UberEATS Clone App

[GitHub Repository](#)

A full stack UberEATS mobile app using React Native and AWS Amplify for the back end, data storage, and user authentication.

Donut Shop App & Dashboard

[GitHub Repository](#)

A React Native donut shop app for users to check out new menu items, order donuts to pick up in store, and sign up to earn donut rewards.

Also developed a React.js dashboard that connects to the donut shop app to fulfill customer's mobile orders and manage donut inventory.
